"Contemporary Islam in AI Narratives" — Quantitative Text Analysis Report (Full 12-Feature Edition)

A comparative summary of the complete quantitative analysis report (86 pages, Analysis ID 019cec92, March 14, 2026; report generated October 5, 2026). Corpus: 100 documents (AI-generated articles), 179 chunks, 146,500 words, average sentiment 0.73, 19 topics, 12 analytics features. Compared across 2 Model groups: gemini-3-pro-preview (99 chunks) vs gpt-5.2 (80 chunks). Note: topic labels in the original report were LLM-generated (gpt-5.6-luna, OpenAI); all other sections are computed deterministically. All figures below are quoted directly from the report.

1. Corpus Profile & Analysis Coverage

Parameter	Value	Notes
Documents	100	All "Article Import" (AI-generated, published Mar 11 2026, ingested Mar 9 2026)
Total chunks	179	gemini-3-pro-preview: 99 (55.3%) · gpt-5.2: 80 (44.7%)
Chunk length	Mean 818 words · median 1,209 · min 4 · max 1,499	Whitespace-based estimates
Total words	146,500	gemini-3-pro-preview: ~79,100 (54.0%) · gpt-5.2: ~67,400 (46.0%)
Average sentiment	0.73	Strongly positive corpus-wide
Analytics features	12	Word Frequency, TF-IDF, Sentiment, Topic Modeling (LDA), N-Grams, Co-occurrence, NER, Text Classification, Text Network, Chunking, Similarity & Redundancy, Framing & Bias
Comparison groups	2 Models	gemini-3-pro-preview · gpt-5.2
Global LDA choice	K=13, C_v coherence 0.5279 (Good)	vs K=8/0.29 "Poor" in the sharia-report project — this corpus separates topics far better
Sources	S1-S100	Source register, Chapter 3 (pp. 82-86)

2. Word Frequency & TF-IDF

2.1 Top-10 terms (raw frequency; gray % = term’s share of that rank-row across the two models)

Rank	gemini-3-pro-preview	gpt-5.2
1	islamic (627) 60.9%	islamic (402) 39.1%
2	halal (199) 47.0%	religious (251) 58.9%*
3	rights (178) 48.8%	halal (224) 53.0%
4	religious (175) 41.1%	rights (187) 51.2%
5	modern (165) 57.9%	islam (163) 61.0%
6	muslim (161)	circular (152) 53.0%
7	economy (138)	legal (134)
8	circular (135) 47.0%	modern (120) 42.1%
9	human (110) 50.0%	human (110) 50.0%
10	islam (104) 39.0%	political (102)

*Row % = share of that term’s total count across both models (gemini uses 60.9% of all "islamic" tokens; gpt-5.2 58.9% of all "religious"). Terms without row % appear in only one model’s top 10.

2.2 TF-IDF distinctive terms

Rank	gemini-3-pro-preview	gpt-5.2
1	halal (4.88)	halal (4.79)
2	islamic (3.42)	circular (3.78)
3	rights (2.79)	rights (2.87)
4	circular (2.65)	modernity (2.50)
5	fashion (2.60)	humanrights (2.21)
6	economy (2.09)	women (2.11)
7	modest (2.06)	human (1.93)
8	women (1.78)	islamic (1.81)
9	shura (1.77)	religious (1.75)
10	green (1.64)	modest (1.73)

Model	Vocabulary Profile
gemini-3-pro-preview	Identity-label heavy: "islamic" +56% and "muslim" ~3× the other model; thematically concrete TF-IDF (fashion, economy, shura, green) — economy/lifestyle/governance lexicon

Model	Vocabulary Profile
gpt-5.2	Sociological-practical: "religious" +43%; unique high-frequency terms absent from gemini's top 20 — legal (134), community-oriented vocabulary; conceptually/legal oriented TF-IDF (modernity, human rights)

3. Sentiment & Topic Modeling (LDA)

3.1 Sentiment (per-chunk polarity)

Label	gemini-3-pro-preview	gpt-5.2	Corpus share (of 157 pos / 22 neg)
Positive	86 chunks (86.9%)	71 chunks (88.8%)	54.8% / 45.2%
Negative	13 chunks (13.1%)	9 chunks (11.3%)	59.1% / 40.9%
Neutral	0	0	— (0 chunks in the whole corpus)
Note	No neutral text at all in either group — a strong alignment-tuning artifact, not a property of the subject matter	Same pattern; difference between groups < 2.5 pp	gemini holds 59.1% of the corpus's negative chunks on 55.3% of chunks

3.2 LDA topics with prevalence (% of model's chunks)

gemini-3-pro-preview — 6 topics	%	gpt-5.2 — 13 topics	%
Islam, Modernity, and Social Reform	37.42	Islamic Governance and Political Modernity	26.71
Halal Standards and Green Islam	19.38	Halal Finance and Circular Economy	14.51
Human Rights in Islamic Law	16.55	Human Rights and Islamic Law	12.57
Islamic Finance and Circular Economy	13.56	Halal Standards and Green Islam	10.06
Modest Fashion and Fabric Choices	8.85	Modest Wardrobe Styling and Fashion	5.20
Democracy and Political Pluralism in Islam	4.24	Islamic Environmentalism and Green Living	5.18
		Halal Economy and Online Islam	10.06
		Islam and Feminism Discourse	5.01
		Halal Ethics: Design and Data	5.80
		Modest Fashion Fabrics and Fits	7.67
		Halal Food and Lifestyle Markets	4.69
		Islamic Environmental Misconceptions	1.66
		Islamic Project Finance Structures	0.89
		Islam Modernity and Digital Practice	0.03

How to read: gemini merges modernity/feminism/rights into one dominant macro-topic (37.4%) — broad narrative arcs; gpt-5.2 resolves into 13 finer topics, separating "Human Rights and Islamic Law" (12.6%) from "Islam and Feminism" (5.0%). Global coherence K=13 scored 0.5279 (Good). gemini's political-pluralism topic is a 4.2% outlier.

4. Named Entity Recognition & Text Classification

4.1 NER highlights (spaCy)

Entity / Type	gemini-3-pro-preview	gpt-5.2
NORP (top)	Islamic 599 · Muslim 259 · Quranic 44 · Western 26	Similar Islamic/Muslim dominance (smaller counts)
ORG (top)	Islam 107 · Green Sukuk 37 · Halal 25 · UDHR 25 · Shura 23 · AI 14	Sparse — very few org entities
PERSON (top)	Muhammad 26 · Maqasid al-Sharia 14 · CDHRI 13 · Prophet 8 · Iqbal 7	Only "Islam" (11) reaches the list
GPE (top)	Indonesia 31 · Turkey 15 · Mecca 11 · Malaysia 11 · Egypt 10 · North Africa 10 · Saudi Arabia 9 · Tunisia 8	Only ~4 GPE entries, mostly artifacts ("Ijara 4", "ponte 1")
LAW (top)	Sharia 32 · UDHR 5 · Article 2/18/6	Sharia 9 only
LANGUAGE	Quran 30 · Arabic 4 · Latin 2	Arabic 2 only
MONEY (artifact)	Markdown headers misclassified: "## Conclusion" 18 · "### 1" 16 · "### 2" 15 ...	Worse: "### 3" 41 · "### 2" 40 · "### 1" 39 · "### 4" 39 ... — list-heavy formatting inflates MONEY
Overall	Far richer entity coverage: people, places, legal instruments, languages	Entity profile thin; needs header-stripping preprocessing

4.2 Text classification (% of chunks)

Category	gemini-3-pro-previe w %	gpt-5.2 %	Notes
Economy & Business	30.2%	18.4%	Gemini's #1 category
Law & Security	20.8%	34.2%	GPT's #1 — legal-security default framing
Islamic Theology & Creed	12.5%	3.9%	Gemini 3x more theological
Environment	11.5%	5.3%	
Islamic Discourse	10.4%	3.9%	
Politics	5.2%	10.5%	GPT 2x more political
Technology	7.3%	7.9%	Similar
Islamic Law & Ethics	1.0%	5.3%	GPT separates law/ethics more
Education / Health / Quran & Revelation	0 / 0 / 0	3.9% / 1.3% / 1.3%	Categories only GPT activates (13 vs 9 categories)
Worship & Ritual Practice	1.0%	3.9%	Marginal in both — striking for a corpus about Islam

5. Text Networks, Co-occurrence & Chunking

5.1 Text network metrics (NetworkX)

Metric	gemini-3-pro-preview	gpt-5.2
Nodes / Edges	50 / 728	50 / 880
Density	0.5943	0.7184
Components	1 (fully connected)	1 (fully connected)
Avg clustering	0.7080	0.7746
Top hub (degree)	islamic (1.00), modern (0.92), religious (0.90), islam (0.84), muslim (0.80), law (0.80)	islamic (1.00), religious (0.98), social (0.92), modern (0.92), practical (0.90), community (0.88)
Hub profile	Identity + religion terms dominate	Practical/community/legal terms rank high (practical, community, public, legal)

5.2 Co-occurrence (identical networks across groups)

Aspect	Detail
Combined network	20 nodes · 15 links shown — key nodes: internal-especially, sources-references-used, supply-sukuk, muslim-majority, external, al-sharia, circular, maqasid-objectives, modest, law, justice, human-rights, halal-declaration
Key pairs (both groups)	ijarah-leasing · consensus-ijma · ijtiḥad-reasoning · balance-mizan · al-sharia-maqasid — Arabic terms always paired with English glosses (bilingual-glossary effect)
Interpretation	Identical topology across providers — the shared source corpus drives identical structural relationships

5.3 Chunking — top phrases per model

Phrase type	gemini-3-pro-preview	gpt-5.2
Noun phrases	circular economy (38) · islamic finance (32) · human rights (21) · women (16) · green sukuk (15) · islamic feminists (14) · secular feminism (11) · muslim women (10)	islamic modernity (32) · human rights (27) · women (19) · islamic environmentalism (19) · islamic radicalism (15) · equal citizenship (14) · assets (12) · democracy (11)
Verb phrases	involves (9) · requires (6) · used (6) · ijtiḥad (6)	used (12) · avoid (10) · include (5) · helps (4)
Adverbial signature	generally (18) · particularly (17) · historically (16) · increasingly (14) · famously (7) — historical-narrative style	especially (55) · long (16) · typically (14) · instead (13) · widely (12) — instructional-listicle style
Adjectival	islamic (4) · aesthetic (3) · human (3) · arabic (2)	actionable (8) · islamic (6) · avoid (3) · narrow (3)

6. Similarity & Redundancy + Framing & Bias

6.1 Similarity & redundancy metrics

Metric	gemini-3-pro-preview	gpt-5.2
Redundancy score	0.68	0.71
Duplicate count	1	3
Clusters / avg size	19 clusters · avg 3.53	13 clusters · avg 4.38
Unique content ratio	0.32	0.29
Max pairwise similarity	0.82	1.00 — a perfect duplicate: two "No external sources used." chunks
Singletons	32	23
Main duplication driver	Circular-economy/Islamic-finance articles share heavy phrasing (0.47–0.57 pairwise)	Boilerplate "No external sources used" reference blocks (exact 1.0 match) + similar circular-finance cluster

6.2 Similarity clusters (shared themes, comparable sizes)

Theme	gemini-3-pro-preview	gpt-5.2
Halal economy / certification	8 docs (avg sim 0.235)	— (spread across clusters)
Circular economy + Islamic finance	7 docs (0.315)	8 docs (0.232)
Human rights / UDHR	7 docs (0.231)	7 docs (0.231)
Modest fashion	6 docs (0.206)	— (in gpt: separate clusters)
Feminism / gender	5 docs (0.192)	5 docs (0.192)
Shura / governance / democracy	5 docs (0.176)	—
Environment / mizan	3 docs (0.256)	3 docs (0.256)
Radicalization / extremism	3 docs (0.157)	2 docs (0.193)
Halal tech / data ethics	2 docs (0.231)	2 docs (0.231)

6.3 Framing & bias detection

Metric	gemini-3-pro-preview	gpt-5.2	Interpretation
Total passive voice (share)	199 (71.6%)	79 (28.4%)	Gemini 2.5x — formal, agency-obscuring academic register
Total hedging	15	17	Comparable; gpt slightly more hedged
Total intensifiers (share)	31 (86.1%)	5 (13.9%)	Gemini 6x — amplifies claims
Total loaded terms (share)	269 (56.2%)	210 (43.8%)	Both value-laden; gemini +28%
Avg complexity grade	15.07	15.18	Virtually identical — college/graduate level
Avg bias score	1.40 (per 1,000 words)	1.17	Gemini’s framing is measurably more biased
Passive ratio	0.05	0.02	
Framing mass* (share / per chunk)	514 (62.3% / 5.2)	311 (37.7% / 3.9)	gemini emits 62.3% of all framing signals on 55.3% of chunks

*Framing mass = passive + hedging + intensifiers + loaded terms (corpus total 825).

7. Per-Model Character Summary (Synthesis)

Model	Analytical Character	Distinctive Strength	Watch Out For
gemini-3-pro-preview	Voluminous identity-focused narrative; merges themes into broad arcs (37.4% single macro-topic); harmonizing tone	Rich entity layer: Indonesia 31, Turkey 15, Muhammad 26, Sharia-as-LAW 32, Quran-as-language 30; concrete themes (halal economy 30%, environment 11.5%); historical adverbial style (historically, famously)	2.5× passive voice, 6× intensifiers, 269 loaded terms, avg bias 1.40 — assertive advocacy-adjacent framing; theology dominance (12.5%) with thin law/ethics (1.0%)
gpt-5.2	Concise legal-security frame (34.2%); fine 13-topic segmentation; list-heavy formatting	Best topic navigation (13 topics incl. dedicated Feminism 5.0% and Human Rights 12.6%); activates more categories (Education, Health, Quran & Revelation); practical/community/legal network hubs	MONEY-NER artifact from ### headers (worst: "### 3" counted 41×); perfect 1.0 duplicate from boilerplate; entity coverage thin (almost no GPE/PERSON); Worship only 3.9%

Common ground across both models:

(1) "islamic" is the #1 term and top network hub for both; (2) halal is the #1 TF-IDF term for both (4.88 vs 4.79); (3) sentiment is overwhelmingly positive with zero neutral chunks in either group (86.9% / 88.8%) — an alignment artifact; (4) identical co-occurrence topology (same 20-node network) confirming shared source material; (5) both underrepresent lived religious practice (Worship & Ritual: 1.0% / 3.9%) and both recycle Arabic terms only as English-glossed pairs (ijarah-leasing, ijma-consensus, mizan-balance); (6) circular economy + Islamic finance is the strongest shared similarity cluster in both corpora.
